

TRANSCENDENCE

presence, without limits.

AI PRESENCE INFRASTRUCTURE · LATIN AMERICA

Turn your company's information into an AI agent that serves, sells, and runs your marketing.

Transcendence is the software platform that turns any company's knowledge into an AI-powered avatar or hologram that serves customers, generates sales, and executes marketing — live and 24/7.

+USD 5,000M

Global holographic display market size in 2026, growing at over **20% annually**.¹ Transcendence operates the **software and AI** layer that runs on top of that hardware — where the recurring value lives.

PROBLEM

Quality human attention —welcoming, guiding, assisting, and selling — **doesn't scale**: it's expensive, keeps limited hours, and performs unevenly. And today's digital alternatives —mute screens and generic text bots— **don't engage and don't convert**. Companies have no way to deploy an intelligent, human, always-available presence at every point of contact.

SOLUTION & PRODUCT

AI holograms — hardware and software. The core is **TRS (Transcendence Runtime System)**: any company uploads its data to the platform and generates an **AI avatar** —realistic or holographic— that **serves, guides, resolves queries, and handles payments**. It runs on proprietary hardware —the **UNIT** line—, which acts as a distribution channel and barrier to entry.

TARGET MARKET

Companies and institutions with high customer-facing volume: **banks, airports, hospitals, restaurants, and sports venues**, among others. Current markets: **Argentina, Paraguay, Brazil, and Uruguay**.

BUSINESS MODEL

SaaS. Recurring TRS license per client/vertical (subscription). UNIT hardware acts as the entry wedge — sold directly or financed by a partner/ advertiser — with Transcendence always retaining the intelligence layer. Model comparable to **Samsara**: device-led entry, software-led monetization.

KEY MILESTONES

Holographic experiences delivered for top-tier brands and figures: a hologram of **Lionel Messi**; the **TRS + UNIT** product launch at the **World Trade Center** in São Paulo; and the **TRS + UNIT** showcase at the **Polkadot** event. Pioneers of AI holographic presence in Latin America — now productized so any company or person can deploy their own hologram.

TEAM & ROLES

Alen Valdivia — Founder & CEO.

Daniella Aiello — Marketing.

Mauro Angemi — Business Development.

Pratham Mangla — CTO.

DEPLOYMENTS DELIVERED

Polkadot · WTC São Paulo · Hotel Alvear · Merge · SYMBIOSIS

Highlight: Gavin Wood, founder of Polkadot, appeared on stage through holographic presence without being physically in the room.

STAGE & INVESTMENT OBJECTIVE

Pre-seed stage, transitioning from experience projects —which delivered proof with top-tier brands— to a recurring **SaaS product**.

Pre-seed round underway.

We're seeking strategic investors aligned with the AI presence category. Round details shared in direct conversation.
